Projects

Car Rental System — Backend (Spring Boot) *Personal Project | Java 21 | Spring Boot 3.5 | MySQL | JWT*

- Built a production-ready RESTful backend with role-based access control for Admin and User roles
- Implemented JWT authentication using Spring Security for stateless API protection
- Designed 3 core modules — Car Management, User Authentication, and Rental Management
- Developed 15+ REST APIs with proper validation, exception handling, and DTO pattern
- Used Spring Data JPA with MySQL for data persistence with auto-generated schema
- Applied clean architecture with Service Interface, ServiceImpl, Repository, and Controller layers
